Please add any comments you consider pertinent

- Thanks for travel arrangements, accommodation requirements!
- Several misunderstandings had been clarified: it was essential to have a long coordinator's meeting.
- The programme for the meeting differed from what happened in reality because much time was spent by Coordinators discussing administrative issues and disputes. This meant that although participants used their initiative to share ideas among themselves and trail recording of some products, participants were left for several hours without clear guidance on what their specific role should be.
